SUMMARY

I'm a tech enthusiast with a strong focus on web development, especially using Laravel, PHP, and WordPress. Over the past few years, I've worked on a variety of real-world projects—from building visa tracking systems and student application platforms to customizing WooCommerce dashboards and integrating ERP software for business operations. I enjoy solving problems, simplifying complex systems, and building tools that actually help people. Whether it's coding custom features, improving user experience, or handling backend logic, I always aim to make things work better and smarter. Currently, I'm sharpening my skills in full-stack development and love combining backend logic with clean, user-friendly interfaces.

WORK EXPERIENCE

Lead Web Security Engineer & Researcher, Cyber Safety First BD — Remote March 2023 – Present

- Worked on website security, social media awareness campaigns, and digital safety training.
- Led and instructed courses on social media security and cyber threat awareness.
- Actively involved in threat detection, incident analysis, and creating safer digital environments for users.

IT Expert, Endow Corporation — On Site (Mohammadpur) January 2024 – December 2024

- Handled all IT-related responsibilities including web development, system management, and daily tech support.
- Managed and maintained company websites using WordPress, Elementor, WooCommerce, and custom PHP features.
- Delivered dynamic and responsive web solutions tailored to business operations.
- Provided hands-on IT support across the office, ensuring systems stayed smooth and secure.

Senior Web Development Executive, Seed to BIG — Remote November 2020 – February 2023

- Focused on WordPress development, building dynamic websites for blogging, job search, and events.
- Created user-friendly, responsive websites with performance optimization.
- Collaborated with creative teams to deliver polished, scalable digital platforms.
- This is where I picked up some of my favorite skills and worked with great people who challenged and inspired me.

VOLUNTARY EXPERIENCE

Vice President, AR/VR & Game Development Lab, DIU January 2025 - Present

- Led technical and administrative coordination for lab-based events and research activities focused on AR, VR, and game development.
- Collaborated with student developers to organize game jams, workshops, and national-level eSports events.
- Provided backend support and helped maintain digital assets and platforms using PHP, WordPress, and custom tools.
- Played a key role in integrating lab activities with wider university initiatives.

Executive Member, BASIS Student Forum DIU Chapter

December 2024 - Present

- Engaged with national-level tech forums under BASIS to promote industry-academic collaboration.
- Participated in IT seminars, startup events, and coding challenges, often supporting tech logistics and event websites.
- Advocated for open-source learning and contributed to awareness programs related to cybersecurity, web development, and career building.

Executive Member, Computer and Programming Club - DIU

March 2023 - December 2023

- Organized coding competitions, workshops, and skill-sharing sessions.
- Mentored junior members on project development, especially dynamic web applications and form-based systems.
- Supported internal and public-facing event platforms, often helping with deployment and troubleshooting.

FREELANCE EXPERIENCE & TECHNICAL EXPERTISE**Freelance Web Developer**

2020 - Present

Self-Employed | Fiverr, Upwork, and Personal Network

- Delivered diverse client projects worldwide, including visa application platforms, education consultancy websites, eCommerce stores, and task management systems.
- Specialized in WordPress customization with deep hands-on experience in:
 - REST API integrations
 - Google Search Console & Fast Indexing API setup
 - Custom map APIs for location-based features
 - WooCommerce customization, including payment gateway integration
 - Elementor-based dynamic frontends
- Built backend systems and custom applications using:
 - PHP, Laravel, and MySQL for scalable and secure architecture
 - Git & GitHub for version control and collaborative development
 - API-driven systems with clean, modular, and maintainable code
- Strong focus on performance, user experience, and search visibility:
 - Optimized websites for speed and SEO
 - Integrated tools like Google Analytics, Search Console, and schema markup

 **Project Showcase:** View my portfolio at jubairamin.me to explore real-world examples of my work.

CERTIFICATIONS

- PHP Laravel Development – OSTAD**

Completed hands-on training on Laravel framework including MVC, routing, Eloquent ORM, and API development.

- Cybersecurity for Professionals – Byte Capsule**

Focused on real-world threat analysis, social engineering, security policies, and digital hygiene for individuals and businesses.

- Blockchain Essentials – Udemy**

Covered blockchain fundamentals, decentralization, smart contracts, and practical use cases in modern industries.

EDUCATION

Bachelor of Science in Computer Science and Engineering (CSE)	2022 - 2026 (Expected)
Daffodil International University — Dhaka, Bangladesh	
<ul style="list-style-type: none">Focused on software development, web technologies, cybersecurity, and database management.Actively involved in tech clubs and student-led initiatives, including AR/VR lab projects and hackathons.	
Higher Secondary Certificate (HSC) in Science	2019 – 2021
BAF Shaheen College Kurmitola	
<ul style="list-style-type: none">GPA: 5.00/5.00Specialized in Physics, Chemistry, Mathematics, and Computer Science.	
Secondary School Certificate (SSC) in Science	2017 – 2019
BAF Shaheen College Kurmitola	
<ul style="list-style-type: none">GPA: 4.89/5.00Focused on Physics, Mathematics, Chemistry basics.	

INTERESTS

- Technology & Innovation:** Passionate about emerging technologies like Blockchain, Cybersecurity, and AI.
- Open Source Contribution:** Actively contribute to GitHub repositories and collaborate with the developer community.
- Gaming & Game Development:** Interested in AR/VR tech and game development, which also ties into my experience in the AR/VR & Game Development Lab at university.
- Travel & Exploration:** Enjoy exploring new cultures and leveraging technology to make travel and business solutions more accessible.
